NEW DELHI 3 (INDIA);

The 16th January, 1950.

S. P. JAIN, for Pegistrar Ceneral, India

NATIONAL SAVINGS ERTIFICATES

Are now available in three different series, maturing after 5.7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100. 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

rull particulars obtainable from all post offices, District Organizers or the sumais-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simila.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in the Provinces of India and some of the Indian States for the week ending the 17th December, 1949.

^{*} In case of towns where there have been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

Explanation of symbols used: B = Births; B. R. = Birth rate; C. = Cholera; S. = Smallpox: P. = Plegue; F. = Fevers; D. D. = Dysentry and Diarrhoea; R. D. = Respiratory diseases; M. D. = Maternal Deaths; D. R. = Death rate I. D. = Infantile Deaths (included in total deaths).

[†] Figures not available.

Births and deaths from principal diseases in towns with a population of over 30,000 in the Provinces of India and some of the Indian States for the week ending the 17th December, 1949—contd.

REMARKS

The figures of births and deaths shown in this statement for the week ending the 17th December, 1949 relate to 192 towns with an estimated population of 24,835 thousands. The total number of towns is 224 and their population is 27,309 thousands. Thus 86% of the total number of towns representing 91% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 17,604 and 9,619 representing birth and death rates of 36.9 and 20.1 per thousand of population respectively.

(A) Indian Provinces.—The data here relate to 166 towns with an estimated population of 21,866 thousands. Information for Bihar and Assam could not be included. The total number of towns is 192 and their population is 23,759 thousands. Thus 86% of the total number of towns representing 92% of the total population is covered. The numbers of births and deaths recorded in these towns were 15,813 and 8,725 representing birth and death rates of 37.6 and 20.7

per thousand of population respectively. The table at end gives the position by provinces.

The towns of Krishnagar in Wost Bengal and Hapur U. P. recorded high death rates of 53.4 and 53.1 respectively. In Krishnagar, the high rate was not due to any one of the specified causes. In Hapur, the high death rate was mainly due to deaths from fevers and respiratory diseases.

(B) Unions and States.— The data here relate to 26 towns with an estimated population of 2,969 thousands. The total number of towns is 32 and their population is 3,550 thousands. Thus 81% of the total number of towns representing 84% of the total population is covered. The numbers of births and deaths were 1,791 and 894 representing birth and death rates of 31.4 and 15.7 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
